

THE ENVIRONMENTAL MODIFICATION
ACCOUNTABILITY ACT

[CLIMATEVIEWER.COM/ENMOD/](https://climateviewer.com/enmod/)

AN IDEA WHO'S TIME HAS COME!

WEATHER WARFARE IS ILLEGAL

The United Nations **ban on hostile environmental modification techniques** was signed in 1978 at the [ENMOD Convention](#).

This law makes weather modification, geoengineering, ionospheric heating, and spraying chemicals (like defoliants) illegal only if the intent is hostile.

WEATHER WARFARE IS UNDETECTABLE

When the United States' CIA became concerned about Russia tampering with American weather in 2015 they called Alan Robock and asked 'would we know?' He stated that we "probably would."

Earlier in 2015, Dian Seidel (NOAA) definitively stated that we cannot tell the difference between natural and man-made clouds.
(20th Conference on Planned and Inadvertent Weather Modification)

We demand transparency and accountability from the Rainmakers, Climate Changers, and **Weather Warriors**.

AIR GLOW

NOCTILUCENT CLOUD

NACREOUS CLOUD

OZONE LAYER

- 1. Ionospheric Heater**
MICROWAVE, NOCTILUCENT, PLASMA CLOUDS, ELF/VLF
- 2. Sounding-Rockets**
CHEMICAL RELEASE, NACREOUS, NOCTILUCENT CLOUDS
- 3. Satellite**
CHEMICAL RELEASE, DEW, IONOSPHERIC HEATER, ELF/VLF GENERATION
- 4. Lasers**
RAIN CCN, IONIZATION, CHANNEL LIGHTNING
- 5. Cloud Seeding**
CHEMICAL RELEASE, RAINFALL, HAIL, CLOUD CLEARING
- 6. Cloud Ionizers**
ELECTRIC RAINMAKING WITH IONS
- 7. Stratospheric Aerosol Injection**
GEOENGINEERING SOLAR RADIATION MANAGEMENT (SRM), CHEMICALS CREATE SUNSHADE: SULFUR, ALUMINUM, TITANIUM, DIAMOND DUST, CALCIUM, BISMUTH TRI-IODIDE.
- 8. Ship Tracks**
MARINE CLOUD BRIGHTENING (MCB), STRATOCUMULUS
- 9. Contrail-Induced Cirrus**
CIRRUS CLOUD CREATION, TRAPS HEAT, MELTS POLES
- 10. Water Vapor Pollution**
CLOUD CREATION VIA: SMOKESTACKS, COOLING TOWERS, WSAC, TMS-65, J2X ROCKET, JET ENGINES

Red Numbers: Considered Inadvertent, Accidental, or Pollution... unless intentional. Objects not to scale. Not included: steering atmospheric rivers

IONOSPHERE
MESOSPHERE
STRATOSPHERE
TROPOSPHERE

HELLO!

I am Jim Lee

I help people understand complex ideas by creating maps, timelines, articles, and lectures.

You can find me at [@climateviewer](https://twitter.com/climateviewer)

I WANT TO HELP YOU UNDERSTAND **THE PROBLEM**

TRANSPARENCY

How can we determine if an individual or organization is engaged in hostile actions if they are not required to explain their intentions or give public notice before experimenting in our skies?

VERIFICATION

How can we catch ENMOD violators without the proper tools to do so?

If we catch violators, who enforces sanctions/penalties?

The Environmental Modification Accountability Act of 2018

a draft legislation to end atmospheric experimentation without notification

TRANSPARENCY

Notify publicly-available
international register
(website) 48 hours prior to
start of experimentation.

VERIFICATION

Build citizen-powered
sensor network to detect
climate manipulation,
rogue geoenignearing, and
weather warfare.

ClimateViewer.com/enmod/

TRANSPARENCY

“To be hostile, or not to be...”

A WORLD-WIDE WEATHER MODIFICATION REGISTRY

REQUIRE: 48 hour notice of intention to experiment in the atmosphere: cloud seeding, geoengineering, ionospheric heating, weather modification, etc.

State purpose, location, etc.
REGISTRY IS ALWAYS AVAILABLE ON INTERNET, UPDATED HOURLY.

TRANSPARENCY MATTERS

- ✗ Public has a right to know
- ✗ Improve accuracy of weather and climate prediction models
- ✗ Examine butterfly effects of hundreds of simultaneous experiments
- ✗ Accountability for environmental, physical, or monetary loss from both legal and clandestine weather modification.

If an individual or organization engages in weather modification activities without notifying the registry (at least) 48 hours before:

MAY BE CONSIDERED HOSTILE & BASED SEVERITY, ENMOD VIOLATION.

Why not just **ban weather
modification** altogether?

WHY BANNING WEATHER MODIFICATION IS UNLIKELY

BANS DO NOT WORK

Above-ground nuclear warhead testing is illegal due to the Limited Test Ban Treaty, YET North Korea tests nuclear warheads.

Best case: build sensors to catch bad actors... more details on that in the Verification section of this presentation.

TOO BIG TO FAIL

Weather modification is over a century old and is a multi-billion dollar industry. Stock markets and insurance companies bet on weather and ensure their bets pay off with this technology.

Water-strapped States will not give up this technology.

HUMANS CONTROL

Unfortunately, it is in our nature to control everything: land, rivers, and oceans. Why would the sky be any different?

Though I would prefer no weather modification at all, men shall dare in the name of progress.

Therefore we **need transparency**.

Transparency is a start!

Transparency may result in public outrage or acceptance. We need to start with disclosure.

Knowing is half the battle...

VERIFICATION

“Trust but verify”

ENMOD HAS NO TEETH!

PROBLEM

If we have a global registry of “legitimate” weather modification experiments, AND we want to catch bad actors, **how do we detect clandestine/military/secret programs?**

SOLUTION

Combine atmospheric sensors worldwide into one super weather warfare detection system. (similar to nuclear monitoring by the CTBTO’s International Monitoring System)

Augment that sensor network with a second, **CITIZEN-POWERED observational network!**

A Citizen-Powered Earth Observing

Sensor Network

[in your backyard]

WHAT IS A SENSOR?

DEFINITION: a device that detects or measures a physical property and records, indicates, or otherwise responds to it.

Sensors are senses for robots: taste, sight, touch, smell, and sound.

Light sensors, wind sensors, geiger counters, video cameras, spectrometers, and radio antennas are just a few examples of common sensors.

DECENTRALIZED IOT NETWORK

ClimateViewer will connect people, robots, and sensors together to display their data in many ways: Graphs, Timelines, Maps, etc.

[ClimateViewer](#) is open-source. ClimateViewer will rely on [Netention](#) to gather sensor data and store it on block chain and Interplanetary File System (IPFS). User and sensor data is distributed on a load-balanced network securely, privately, and indefinitely.

15,400,000,000

In 2015, there were about 15.4 billion connected [IoT] devices. According to IHS, this number will grow to 30.7 billion in 2020, and 75.4 billion by 2025.

Wearable devices are also noticeably growing. From 28.3 million units sold in 2016, IDC forecasts an increase to 82.5 million units in 2020, a 31 percent growth.

13 stunning stats on the Internet of Things

LET'S PUT THEM TO WORK!

LIVE STREAMING ATMOSPHERIC DATA

	Records	Uptime	Rating
Rain Samples	1,089	85%	99%
All Sky Camera	32,420 hours	100%	100%
Aerosol Samples	23.589	72%	85%

REAL-TIME SENSOR MAP

CLIMATEVIEWER SENSOR NETWORK BENEFITS

- ✗ Act as a verification regime in parallel with a separate government-backed sensor network.
- ✗ Combat censorship of “official” sensor data by creating a dataset with no centralized control. [Think ClimateGate]
- ✗ Gather priceless observational data that will improve all atmospheric sciences, let alone, **catch bad guys**.
- ✗ Prevent further loss of life from acts of Terrorism. Help first responders to biological and radioactive aerosols, dirty bombs.
- ✗ Accountability for environmental, physical, or monetary loss from both legal and clandestine weather modification.

THE ENMOD ACCOUNTABILITY ACT

HOW IT WORKS

[CLIMATEVIEWER.COM/ENMOD](https://climateviewer.com/enmod)

LET'S REVIEW SOME CONCEPTS

Weather Warfare Is Illegal

The Environmental Modification Convention (ENMOD), formally the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, was signed in 1978.

48 Hour Public Notice

This is a monumental change to disclosure of atmospheric experimentation and will create accountability for cloud seeders and geoengineers alike.

Geoengineering is Banned

The Convention for Biological Diversity placed a moratorium on large scale geoengineering experiments in 2012. The USA did not sign this agreement.

ClimateViewer Sensor Network

Combining every publicly available IoT sensor and creating our own specialized local ClimateViewer for your backyard to track flights, boats, watch your sky, and VERIFY who's controlling your weather!

Bans Do Not Work

The only thing that matters is proof. Knowing is half the battle, the rest can usually be settled in court! We have the technology, let's see the evidence. We need to know that storms are not man-made!

Amendment to ENMOD

The ENMOD Accountability Act is a draft legislation and is intended to be written into law and enforced because it is necessary for the safety of humanity.

“Unless someone like you cares a whole awful lot,
nothing is going to get better. It’s not!” – Dr. Seuss,
The Lorax

THANKS!
